

§ 644.531 Warning to public of danger in handling explosive missiles.

When any land which has been contaminated with explosive objects, or chemical/biological agents, is released for disposal to, or use by, the general public in addition to the clearance statement furnished to the disposal agency, the DE will publicize, to the fullest extent practicable, the possibility of contaminants remaining on the land and the inherent danger of handling explosives or other contaminants. Such publication should be in the form of articles in official news media, or posting of the premises whenever the later is considered most feasible. Such publicity should include instructions that, in the event of the discovery of an explosive missile, or an object resembling an explosive missile, or other contaminant, or in the event of an injury caused by an explosion or exposure to toxic agents, such discovery or injury should be reported immediately to the DE. An effort should be made to obtain the cooperation of local law enforcing agencies to insure the prompt reporting of an accident, or the discovery of an explosive missile. The majority of accidents are the result of the removal of explosive missiles by individuals for sale to scrap dealers. Scrap dealers in the vicinity of contaminated lands should be informed of the inherent dangers and asked to cooperate by refusing to buy military scrap from private parties.

§ 644.532 Reporting accidents.

Immediately upon receipt of information of an accident involving, or appearing to involve, explosive or chemical/biological elements remaining on, or carried from an excess or surplus installation, whether under the jurisdiction of the Corps of Engineers, other Government agency, or sold or returned to public or private owners, the DE will institute an investigation and prepare a report prescribed by AR 385-40 and OCE Supplement thereto. Further, upon determination that an accident has occurred, the former using command should be requested to send qualified explosive, chemical or biological specialists to the scene of the accident immediately, in order that proper corrective measures to elimi-

nate future accidents may be instituted. HQDA (DAEN-REM) will be immediately informed, by teletype, of any accidents due to explosives on lands which have been used by the Department involving injuries to persons and/or animals, or damages to private property.

§ 644.533 Contamination discovered after return of land to owner, or sale.

When land has been previously declared clear of explosives or other dangerous material so as to be safe for all uses and disposed of, but is later found to have been contaminated to such an extent that, in his opinion, it is dangerous to the public, the DE will request the former using command to re-examine the land for the purpose of determining the extent to which the original Statement of Clearance should be revised and to determine the kind and cost of any further clearance work by the using command which would be required to place the property in the condition set forth in the original Statement of Clearance. If further clearance work is necessary and considered economically justified, the DE will request the using command to perform such work and furnish a new Statement of Clearance and record of the further clearance effected. If further clearance work is not considered economically justified, he will make a report thereof to DAEN-REM with his recommendations and pertinent supporting data. Recommendation for reacquisition of contaminated lands will be limited to those which involve full restrictions of both surface and subsurface uses. Where subsurface use of lands only is to be restricted, it is preferable to make compensation to the owners through claim procedure, when and if instituted by the owner on his own initiative.

§ 644.534 Return of public domain land.

(a) *General.* The procedures described elsewhere in §§ 644.516 through 644.539 to carry out the continuing responsibility of the Department of the Army to assist and advise the land holder and protect the public from dangerous substances on or in the land after release

are equally applicable to public domain lands. Air Force policy and procedures are generally comparable.

(b) *Congressional.* A provision has been added to several laws enacted by Congress that upon request of the Secretary of the Interior at the time of final termination of the reservation effected by the Act, the Department of the Army shall make safe for nonmilitary uses the land withdrawn and reserved, or such portions thereof as may be specified by the Secretary of the Interior, by neutralizing unexploded ammunition, bombs, artillery projectiles, or other explosive objects and chemical agents. The intent of the provision is explained by a statement of the Committee on Interior and Insular Affairs, House of Representatives, in Report No. 279, 87th Congress, 1st Session: The committee concluded that it would be appropriate to amend the bill to designate the Secretary of the Interior to act on behalf of the Federal Government in delineating the areas to be made safe for nonmilitary use when the lands are no longer required for defense purposes. "It is expected that the Secretary of the Interior will not require the Department of the Army to proceed with expensive cleanup work in areas where there would be no direct benefit. On the other hand, it is anticipated that when potential resources or use values are such as to make dedudiving or decontamination advisable, the Secretary of the Interior will identify those resources and values for the Secretary of the Army. This will permit a full and complete justification in the event that a separate appropriation therefor is required." Report No. 279 also quoted the following policy statement by the then Bureau of the Budget:

... requirement for decontamination should be related to a standard not only of practicability, but also to one of economic feasibility that takes into account the desired future use and value of the land to be decontaminated.

(c) *Army.* The congressional policy outlined above does not change the existing Army policy. Its principal effect is to make it clear that the Secretary of the Interior has an equal interest with the Secretary of the Army in the final decision on whether it is prac-

ticable or feasible to clear lands for return to the public domain, and the extent of clearance. No difficulties in reaching agreement with Interior in these matters are anticipated. Where large expenditures are involved it will usually be necessary to request a special appropriation, leaving the final decision to Congress. In any instance, if difficulty in reaching agreement with officials of the Bureau of Land Management (or the Secretary of the Interior) should occur, it will be reported promptly to DAEN-REM with complete background data for review and instructions.

§644.535 Support in clearance of Air Force lands.

Where Air Force range lands are proposed for disposal, the AFLC, in most cases, will make an economic study to determine the extent of clearance that is justified by the relative values of the property before and after decontamination. For this purpose, AF commands declaring range lands excess will submit a copy of the excess recommendation to the AFLC. Upon request, the DE will prepare and furnish a disposal planning report to the AF Logistics Command for assistance in making the economic study. The disposal planning report will include, but need not be limited to, the following:

(a) A map which depicts and annotates differing areas according to their estimated highest and best use.

(b) An appraisal report reflecting the fair market value of each of the differing areas based on their highest and best use, and based on the assumption that the lands are entirely free of dangerous materials or other contamination. AFLC will compare such evaluation with cost of decontamination work. While needed primarily in connection with the return of AF range lands to the public domain, economic studies may be made and disposal planning reports requested by the AF in other areas.

§§644.536—644.539 [Reserved]

SALE PROCEDURE

§644.540 Advertising.

(a) *Definition and Purposes.* GSA regulations require that disposal agencies

shall widely publicize all surplus real property which becomes available for sale. Sales will be made to the highest responsible bidder after advertising. Advertising consists of the preparation of Invitation for Bids, the posting of copies thereof in public places, their distribution to interested persons or prospective bidders, and publication of notice of sale in newspapers where such publication is deemed advisable or is required by this Subpart F. The purpose of advertising and obtaining competition in selling Government property is:

(1) To give all qualified persons equal opportunity to bid for the property.

(2) To secure for the Government the benefits which flow from competition.

(3) To prevent criticism that favoritism has been shown by officers or employees of the Government in making sales of public property.

(b) *Notice to Department of Commerce.* A condensed statement of proposed sales of surplus real property by advertising for competitive bids, except where the estimated fair market value of all the property included in the advertisement is less than \$5,000, shall be prepared for publication in the U.S. Department of Commerce publications, "Commerce Business Daily." Guideline is contained in the Defense Acquisition Regulation (DAR) 1-1005.1, (formerly the Armed Services Procurement Regulation). Forward statement to: U.S. Department of Commerce, Commerce Business Daily, P.O. Box 5999, Chicago, Illinois 60680.

(c) *Procedure.* Whether newspaper advertising in addition to distribution and posting of Invitation for Bids is desirable will depend upon the value of the property and in some instances the anticipated interest in the property. The ever-changing market requires different methods or efforts to obtain the best price for the Government. The time allowed for submission of bids will depend upon the time available, usually 30 days. If available, a longer period may be desirable based on value and other factors. A shorter period may be necessary and, in an emergency, a period of less than 10 days may be allowed. However, the contracting officer should make a record of written findings to support such a deci-

sion. If the emergency is based on requirements of the using command that appear questionable, a report with recommendations should be forwarded to DAEN-REM by the most expeditious means.

(d) *Bidders Mailing Lists.* Instructions contained in procurement regulations are applicable generally for establishing, maintaining, and controlling bidders mailing lists (DAR 2-205). Generally, all proposed sales should be preceded by an advance notice, to eliminate disinterested bidders and as a measure of economy in printing and distributing voluminous Invitation for Bids. Notice to bidders will provide that their failure to respond to two successive sales offerings will result in the removal of their names from the bidders list. When time does not permit an advance notice, one copy of the Invitation may be sent to the potential bidder, which contains the following notice: "Attention Bidders. If interested in bidding on any or all items, three (3) additional copies will be furnished on request." The advance notice will describe the property offered and ordinarily provide that Invitation for Bids will be mailed on request or may be picked up at the installation or project at the time the property is inspected.

(e) *Inspection of the Property.* Upon request, interested persons should be permitted to make appropriate inspection of the property, including inventory records, plans, specifications, and engineering reports, subject to any restrictions necessary in the interest of national security and to such reasonable rules as may be prescribed by the using command or the DE.

§ 644.541 Award of contract.

(a) *Opening of Bids.* All bids shall be opened and publicly disclosed by a duly authorized representative of the responsible DE at the time and place stated in the Invitation and advertisements.

(b) *Award and Notice to Bidders.* Award shall be made with reasonable promptness by notice to the responsible bidder whose bid, conforming to the Invitation for Bids, will be most advantageous to the Government, price and other factors considered, provided that any or all bids may be rejected
